

In School Programs

2017-2018

Wicked Cool For Kids is happy to present in-school programming. Our STEAM-based enrichment offerings will bring wicked cool science to your school. Empower your students with science literacy and an unforgettable hands-on experience. Our science and technology programs align with [Next Generation Science Standards](#) and promote a fun, experiential learning environment!

Program Description

Our in-school programs put the fun into inquiry-based learning while integrating national standards for meaningful outcomes. We can put together a custom topic-based program for two to six hour-long sessions.

Design your own STEAM program by choosing from the following disciplines:

Program Details

Format

- ★ 2-6 sessions of one-hour theme-based programs
- ★ Our instructors work with children and classroom teachers in your school space

Pricing

- ★ \$250/class for the first hour long class up to 25 kids
