## COMPREHENSIVE KITS

Wicked Cool for Kids has provided community based organizations with comprehensive solutions for STEAM-based enrichment programming for over 10 years. Our success is based on kid-approved, well designed, and easy-to-follow curriculum. Our kit systems will make it possible for your staff to roll out fun and educational hands-on science enrichment anywhere! Kits include printed and online curriculum manual and lesson components packaged for individual or small group use.

*"Girls STEAM Squad was a huge success for our program. It filled quickly and parents and kids couldn't wait for it to begin. The girls love the projects we have done and are thoroughly engaged in the process. I even overheard one girl say to her friend, 'This is so great! I'm so happy we signed up for Girls STEAM Squad!' I can't wait to try our next program from Wicked Cool for Kids."*

*Betsy Hoffmeister, Assistant Program Coordinator, Essex VT Parks and Recreation*

## EDUCATIONAL FOCUS

Our supplemental enrichment curriculum helps kids make real world connections to science and supports learning to build science knowledge using hands-on, experiential problem solving and experimentation. Wicked Cool For Kids lessons are designed to motivate students to make sense of phenomena through individual and group challenges, modeling, and the use of the engineering design process.

## STEAM SOLUTIONS

Now, with resources from Wicked Cool For Kids, your staff can be the science experts -- a perfect partnership! Topics change yearly for ongoing solutions to your enrichment needs. See our website for current topics.
