

After School Programs

2026 - 2027

Wicked Cool For Kids

Science

K-5th Grade

Kids Cool Chemistry

Be a cool chemist as we use primary colors to create a rainbow of slime, make amazing magnetized putty, and use the power of pH to make color changing solutions. Dig deep into a diaper to experiment with super absorbent polymers and create a classic mini volcano to erupt. Fun and colorful chemistry experiments every week!

Enchanted Science

Experience science through the eyes of Disney movies. Step into the world of Encanto, and explore the magical way plants use energy from the sun, examine super strength and the power of the weather. Let Moana guide you through exploring the ocean waves and the amazing lives of sea turtles. Friends from Frozen will become temperature detectives with Olaf and make a spinning snowman top. Magical STEAM fun!

Wild World Safari

Dive into a global adventure to discover the wild world of animals and their amazing adaptations! Explore Earth's biggest land animals and creatures who live in the deepest oceans. Study your favorite wild animals to determine if they are predators or prey and where they fall on the food chain. Identify track patterns and build 3-D models of extreme habitats as we investigate our planet's vital natural resources.

Mission to the Moon

Go on an intergalactic mission to create a lunar base! Build a telescope to navigate your way to the perfect landing spot. Make a model air rocket and test out how to make the perfect supply drop. On arrival, create moon rovers, biospheres to grow plants, and then build space modules where astronauts could live!

Art Explosion

Where science, culture and art meet! Get messy with colors, crafts and creations to create African Masks and Junk Prints with recycled materials. Use objects from nature to make Pop Art prints, and explore motion by making a Chinese paper dragon. Explore patterns with a simple loom for weaving and create spatter art with paint and stencils.

LEGO

LEGO WeDo 2.0 Robotics

Get hands-on with LEGO WeDo 2.0 Robotics and dive into science and programming! You'll learn to code by designing and building cool, moving robots using LEGO software and kits. We'll be creating sensor-equipped robots and even testing building designs on a shake table to see how they hold up in simulated earthquakes. Grades 1-5

LEGO BricQ Motion

Explore the exciting world of forces and motion through LEGO investigations. Test design solutions by changing the speed or direction of objects with pushes and pulls. Build a dog obstacle course and compete in the LEGO Olympics with relay races, bobsled competitions, and hockey games in this fun, collaborative STEAM-focused program. Grades 1-5

LEGO Junior Builders

Spark your creativity and learning with this introductory LEGO program. Using standard LEGO bricks and minifigures, engage in cross-curricular activities focusing on design, building, and classification. Earn your builder's license by constructing bridges, wheelchairs, and inventing your own machines, progressing into STEM-based challenges. K-1

Program Info

Program Fees and Duration: All programs are structured to include eight 1-hour classes, with a total cost of \$224 per child. For variations in length or the number of weeks, please feel free to inquire.

Minimum/Maximum: The enrollment minimum for all after school programs is 7. The maximum is 15.

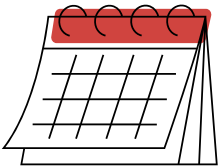

Grades: Most of our programs are suitable for grades 1-5. Whenever possible, we suggest you choose the 3 grade span best suited to your community: 1st-3rd, 2nd-4th or 3rd-5th.

Staff: We believe that our staff should learn and have fun teaching Wicked Cool programs, just like the kids do. We look for enthusiastic, friendly staff who are experienced in classroom management or are willing to learn by doing with veteran staff. Our instructors are often education majors, school teachers, career changers and other wicked cool people. Everyone is background checked.

To Book a Program:

Please contact our program coordinator, Amanda Pang.
Programs@wickedcoolforkids.com 781-281-2180

Start dates:

Fall session starts the week of September 14

Winter/Spring session starts the week of January 11

Contract

Once a program is booked, we will generate a confirmation of services, and send you a certificate of insurance.

Confirmation

A program needs to be confirmed with us at least 7 days before its start date in order to run. Remember it must reach our minimum of 7.

Payment

Please add your administrative charges to our fee. We submit invoices before the end of the program. Payment is due 7 days after the program end date.
