

Special Programs

Ignite curiosity and empower your community with science literacy!

Our programs are designed to engage with projects that enhance learning while ensuring a fun and dynamic experience that will leave everyone buzzing with excitement!

Flying Things

Become an aerospace engineer by building and launching an array of flying creations! Explore the principles of flight—including lift, thrust, and Newton's Third Law of Motion—while constructing foam flyers, straw-powered air rockets, paper copters, and elastic band-powered helicopters. * *Summer only* add on water rocket build and launch for high flying fun!

Tiny Worlds

Using the awesome power of an easy to use digital microscope, explore tiny worlds around you. Go on a microscope scavenger hunt and see minute details in everyday things. Examine rocks and minerals, shells and fossils, flowers and leaves, electronics and bugs! Identify international coins and find them on a world map.

STEAM Jewelry Designer

Combine science and art to craft custom jewelry using paper beads, glass, and plastic. Explore STEAM concepts like math and engineering through patterns and planning. Design secret code bracelets, solar system necklaces, or glow-in-the-dark keychains with endless creative possibilities!

Slime Time

Discover how chemicals combine to create cross-linked polymers by making five epic slime formulas. Start with out-of-this-world green Alien Slime, then create Rainbow Slime as primary colors explode into secondary hues. Craft magical Unicorn Slime, celebrate with scented Birthday Cake Slime, and finish with fun Fluffy Slime.

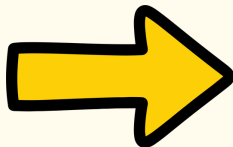

LEGO Challenge Club

Join our 90-minute LEGO extravaganza! Use hundreds of bricks and unique challenge cards to build futuristic cities, alien worlds, or pirate ships. While discovering engineering principles to become a master builder, you can work toward earning an official "Builder's License" and a LEGO prize to take home.

PROGRAM INFORMATION

Program	Audience	Duration
Flying Things! • Water Rocket Add On	• Kids 8+ • Families	90 minutes 45 minutes
Tiny Worlds	• Kids 8+ • Families • Teens • Adults/Seniors	90 minutes
STEAM Jewelry Designer	• Kids 8+ • Families • Teens • Adults	90 minutes
Slime Time	• Kids 8+ • Families • Teens	90 minutes
LEGO Challenge Club	• Kids 8+ • Families	90 minutes

*Kids under 8 welcome with supervising adult
